AMENDMENT

Assistant Commissioner for Patents
Washington, D.C. 20231

April 15, 2002
(Monday)

Sir:

In response to the Examiner's Office Action dated December 14, 2001, with a one-month extension being petitioned to April 14, 2002, the following amendments and remarks are respectfully submitted in connection with the above-identified application.

In the Specification

Please replace page 8, lines 14-17 as follows:

A1
--When power (AC 220V) is applied, the microcomputer mounted on the epoxy PCB 102 is in a standby state. When the microcomputer generates a command, the command is transmitted through the socket 103 to the high voltage IC (HVIC) mounted on the ceramic PCB 101.--
